Made Safe NL Safety Consortium

CME NL invites you to become a member of the **Made Safe NL Safety Consortium**, a learning network of manufacturing and processing safety professionals, business owners, and stakeholders, all working towards a unified goal of improving health & safety in our sectors by sharing and exchanging ideas and expertise in a trusting environment.

The **Made Safe NL Safety Consortium** will achieve this goal by:

- **SHARING** best practices, experiences, techniques, resources, tools & technologies
- **ENGAGING** in capacity-building learning events, including webinars, guest speakers, lunch-n-learns, facility tours, safety talks, & workshops
- **FACILITATING** networking opportunities
- **IDENTIFYING** new or better ways to solve long-standing health & safety challenges
- **PARTICIPATING** in the annual safety symposium
- **DEVELOPING** policies, procedures, & tools for members to use to improve workplace health & safety
- **HIGHLIGHTING** member successes through storytelling & case studies
- **IMPLEMENTING** lessons learned to reduce injury or illness lost-time incident rate
- **COMMUNICATING** through regular consortium meetings

Be on the ground floor of something great! A think tank of subject-matter safety experts and business owners working towards building safer workplaces in Newfoundland and Labrador's manufacturing and processing industries.
