SAFETY LEADERSHIP WORKSHOP for Senior Leaders and Business Owners

79 Mews Pl. | St. John's | Nov. 23, 2023 | 8:30 a.m. – 12:30 p.m.
(Breakfast Available 8:00 am - 8:30 am)

Leaders are vital 'top-down' influencers for organizational health and safety culture and performance. They establish an organization's values and standards, promote an environment that values health and safety (H&S) compliance, and most importantly ensure the well-being of workers.

Workers mimic the values of their leaders. When they see that their leaders genuinely value health and safety, they will, too.

This half-day workshop, *Safety Leadership for Senior Leaders and Business Owners*, is designed to help workplace leaders—whether you're a senior manager, executive, or business owner—learn best practices to inspire and support a culture that values health and safety at all levels of your organization.

Learning Objectives:

- How to prioritize H&S as part of your overall business strategy
- The value of H&S as a strategic and integral part of managing your business
- Legal requirements, obligations, and responsibilities of senior leaders and business owners
- How to identify and mitigate risk for leaders and the organization
- How to leverage leadership to build and sustain a strong H&S culture
